STOP!
Avoid hot work when possible! Consider using an alternative cold work method.

This Hot Work Permit is required for any temporary operation involving open flames or producing heat and/or sparks conducted outside a Hot Work Designated Area. This includes, but is not limited to: brazing, cutting, grinding, soldering, torch-applied roofing and welding.

### Instructions for Permit Authorizer/Fire Safety Supervisor

1. Specify the precautions to take.
2. Fill out and keep Part 1 during the hot work process.
3. Issue Part 2 to the person doing the job.
4. Keep Part 2 on file for future reference, including signed confirmation that the post-work fire watch and monitoring have been completed.
5. Sign off final check on Part 2.

### Required Precautions

- The fire pump is in operation and switched to automatic.
- Control valves to water supply for sprinkler system are open.
- Extinguishers are in service/operable.
- Hot work equipment is in good working condition.

### Requirements within 35 ft. (10 m) of hot work

- Shield combustible construction using FM Approved welding pads, blankets and curtains.
- Remove combustibles or shield nonremovable combustibles using FM Approved welding pads, blankets and curtains.
- Isolate potential sources of flammable gas, ignitable liquid or combustible dust/lint (e.g., shut down equipment).
- Remove ignitable liquid, combustible dust/lint and combustible residues.
- Shut down ventilation and conveying systems.
- Remove combustibles and consider a second fire watch on opposite side of floor, wall, ceiling or roof when openings exist or thermally conductive materials pass through.
- Does site contain combustible construction (with or without concealed spaces), warehousing, or other heavy combustibles? If yes, treat as “Hot Work High-Risk Area” and provide ADDITIONAL REQUIRED PRECAUTIONS below.
- Is work on a combustible roof? If yes, treat as a “Hot Work High-Risk Area” and provide ADDITIONAL REQUIRED PRECAUTIONS below.
- Hot work on/in closed equipment, ductwork and piping
  - Isolate equipment from service.
  - Remove ignitable liquid and purge flammable gas/vapor.
  - Remove combustible dust/lint or other combustible materials.
  - Is work on/in equipment with nonremovable combustible linings or parts? If yes, treat as a “Hot Work High-Risk Area” and provide ADDITIONAL REQUIRED PRECAUTIONS below.

### Fire watch/fire monitoring the hot work area

- Perform a continuous fire watch during hot work.
- Perform a continuous fire watch following hot work completion for 60 minutes.
- Perform a final checkup of the area following the fire watch after hot work completion.

### ADDITIONAL REQUIRED PRECAUTIONS:

- “Hot Work-High-Risk Area” — perform fire monitoring following fire watch completion for 3 hours.
- “Hot Work-Standard Area” — perform fire monitoring following fire watch completion for 1 hour. Active monitored fire detection systems are an acceptable fire monitoring option.
WARNING
HOT WORK IN PROGRESS! Watch for fire!

Instructions

Person performing hot work: Record time started and display permit at hot work area. After hot work is completed, record time and leave permit displayed for fire watch.

Fire watch: Watch area during hot work and after work completion. Prior to leaving area, perform final inspection, sign, leave permit displayed and notify Fire Monitor or Permit Authorizer/Fire Safety Supervisor.

Fire Monitor: Monitor area after post-work fire watch completion. Perform final inspection, sign and return Permit Authorizer/Fire Safety Supervisor.

Required Precautions

NA

- The fire pump is in operation and switched to automatic.
- Control valves to water supply for sprinkler system are open.
- Extinguishers are in service/operable.
- Hot work equipment is in good working condition.
